

GREENER SMES FOR A MORE SUSTAINABLE WORLD

Policies and instruments to support Industry low-carbon transition in Central Europe

ONLINE EVENT from 9.30 to 12.00

To invest to support the industry transition to a greener and more sustainable economy is one of the challenges at worldwide level. **FIRECE Project** – arrived at its **Final Event** – supports the implementation of the Regional Energy Plans of Partners located in Austria, Croatia, Czech-Republic, Germany, Hungary, Italy and Poland, promoting Innovative Financial instruments and the optimisation of the public investments addressed to Industry low-carbon transition.

The Final event will be the opportunity to learn from Partners' experience during the project, to learn on the most interesting products developed by the project and to be informed about the future opportunities coming by Interreg EUROPE 2021-27 about the project topics.
